SCROFULA The Blighting Disease of The laws of health require that the bowels move once each day and one of the permittee for violating this law is piles. Keep your bowels regular by tak-Scrofula and Consumption are alike; they develop from the same general causes, both are hereditary and dependent upon an impure and important povished blood supply. In consumption the disease fastens itself upon the lungs; in Scrofula she glands of the neck and throat swell and supply rate, causing ugly running sores; the eyes are inflamed and weak; there is an almost continual discharge from the ears, the limbs swell, bones ache, and white swelling is frequently a result, causing the diseased bones to work out through the skin, producing indescribable pain and suffering. Cutting away a sore or diseased gland does no good; the blood is poisoned. The old scrofulous taint which has probably come down through several generations has polluted every drop of blood.

Scrofula requires vigorous, persistent treatment. The blood must be brought back to a healthy and Liver Tablets when necessary and you will never have that severe punishment inflicted upon you. INSPECTOR'S REPORT.

Mines and Output.

INCREASE OVER LAST YEAR.

The mine officials and operators worked for five hours with a view to throughout the territory have done prevent the spreading of the flames to everything that I have requested of Walker & Co.'s double story brick ad- them relative to the sanitary condition joining and other adjacent property, of the miners and the ventilation of the Many times it seemed that the flames mines. I have no reason to complain of orners and those in charge to comply

The general conditions of the mines was confined to one rear room, where in the territory have been and are

six more than during the flood year ended June 30, 1899; mines not in operation, seven; mines abandoned, five; new

mines opened, seven. The production of coal for the fiscal year ended Jone 30, 1900, la sa follows: Hernalillo county, 548,150 tons; Colfax Santa Fe county 110.212 tons: Socorre county, 6.00 tone; making a total of 1,187,334 tone, the estimate value of which, at the mines, is \$1,837,166. The June 30, 1900, shows an increase of 13%. 309 tons over the total production of the previous fiscal year and an increase in the total estimated value for the fis

cal your of \$238,577. The total number of employes in and about the coal mines of the territory, as reported to me, are as follows: Miners. 1.658; boys. 90; day men, 267; mak-

ing a sotal of 2,016 employes, Of the thirty-one mines reported in operation this year a majority of them are operated by a slope, double entry, room and piliarmethod, while the others are operated by a slope, double entry, town and pillar or drift, single entry, room and pillar, except the Grown Point compartment shaft, double entry, room ed on April 3, 1700.

The Colorado Fuel and Iron company sported to me as mine impector production of coke made at Walda coke overs. Santa Fe county. New Mexico. for the fixed year, 21,953.50 tons. Production of the Gardiner coke ovens at Gardiner, Colfax county, New Mexico for the fiscal year, 18,310.50. The coke made at both of these ovens is made from Starkvijie stack, Starkville mine, situated in Las Anims county, Coloredo, on the Atchison, Topeka & Santa Fe railway, and the total number of toms produced by the Colorado Fuel and Iron company is 40,264.30 tons.

The production of coice from the Raton Coal and Iron company's ovens at Gardiner and produced by the Raton Coal and Coke company during the fis oul year was 2.529 tons, making the total number of tone of coke made in the territory during the fiscal year, 42,-800,30.

The inspector's annual report to the complete in every particular. He reports that it has been impossible, owing to the scarcity of miners, for the various conl companies to meet the demand for New Mexico coal. The production of coul and cuke has been materially inpreased during the fiscal year, yet the demand has been much greater than for a short time early in the evening. the supply. The report, when printed seconditating the lighting of lamps at will be worth the time of a careful perussi, as the facts presented and the mage and illustrations engraved from the photographs of the various mines, their buildings and plants, add especial interest to this year's report.
